

Helping Your Child Eat Healthy Foods and Be Ready to Learn

(5–7 Years)

Children need to eat a variety of healthy foods each day to help them do their very best at school. Here are answers to important questions you may have about your child's nutrition.

How can our family eat healthy meals together when we are so busy?

- Make food preparation and cooking a family activity.
- Eat different meals together. For example, eat breakfast together one day and lunch or dinner the next.
- Buy healthy ready-to-eat foods from the store or healthy take-out foods from a restaurant.

How can I get my child to eat breakfast?

- Provide foods that are fast and convenient, such as bagels, low-fat granola bars, fruits, 100% fruit juice, and yogurt.
- Serve foods other than the usual breakfast foods (for example, sandwiches, baked potatoes, and leftovers such as chicken or pasta).
- Help your child get organized so that she has time to eat in the morning.
- Make breakfast the night before.
- If your child is in a hurry, offer her foods such as fruits or trail mix to eat at school.

How can I get my child to eat more fruits and vegetables?

- Keep a variety of fruits and vegetables at home.
- Keep 100% fruit juice in the refrigerator.
- Wash and cut up fruits and vegetables and keep them in the refrigerator, along with low-fat dip or salsa. Use a clear container so that the fruits and vegetables can be seen easily.

- Serve two or more vegetables with dinner, including at least one your child likes. Serve a salad with a choice of low-fat dressing.
- Pack fruits (including 100% fruit juice) and vegetables in your child's bag to eat at school.
- Be a good role model—eat more fruits and vegetables yourself.

My child snacks on chips and candy . . . What should I do?

- Limit foods that are high in fat, such as potato chips that are fried, and foods that are high in sugar, such as candy and soft drinks.
- Serve healthy foods, such as pretzels, baked potato chips, low-fat granola bars, popcorn, 100% fruit juice, fruits, apple sauce, vegetables, and yogurt.
- Keep a bowl of fruit on the kitchen table or counter.

How can I help my child get enough calcium?

- Serve foods that are rich in calcium, such as low-fat milk, cheese, yogurt, tofu processed with calcium sulfate, broccoli, and collard and turnip greens.
- Serve flavored milk, such as chocolate or strawberry.
- Use low-fat dairy products in recipes, such as in puddings, milkshakes, soups, and casseroles.
- Serve unusual dairy products, such as new flavors of yogurt.
- If your child's digestive system cannot handle milk and other dairy products (he is lactose intolerant), try these suggestions:
 - Serve small portions of these foods throughout the day.
 - Serve these foods along with non-dairy foods.
 - Serve lactose-free dairy products, yogurt, and aged hard cheeses, such as Cheddar, Colby, Swiss, and Parmesan, that are low in lactose.
 - Give your child lactase tablets before he eats dairy products containing lactose.
 - Add lactose drops to your child's milk.
 - Serve foods, such as orange juice and cereal products, with added calcium (calcium-fortified).
- If these ideas do not work, ask a health professional about giving your child a calcium supplement.

How can I help my child be more active?

- Encourage active, spur-of-the-moment physical activity, such as playing tag or hide and seek.

- Limit the time your child spends watching TV and videotapes and playing computer games to 1 or 2 hours per day.
- Give your child chores, such as raking leaves or walking the dog.
- Make physical activity a part of your child's daily life. For example, use the stairs instead of taking an elevator or escalator.
- Participate in physical activity together, such as playing ball or going biking or skating. It is a great way to spend time with your child.
- Enroll your child in planned physical activities, such as swimming, martial arts, or dancing.
- Work with your community to make sure that your child has safe places for being physically active, such as walking and biking paths, playgrounds, and parks.
- Be a good role model—participate in regular physical activity yourself.
